Subject: 1BH-RFS0910 Spill Contingency Plan

Good Afternoon Marc

After an internal Preliminary Technical Review of the Spill Contingency Plan submitted under Part H, Item 1 of Licence No. 1BH-RFS0910, the NWB requests a resubmission of the Plan to address the following deficiencies:

1. Quantities and Locations of POL's and other hazardous materials should be included;
2. Include the number of personnel on site and the reporting structure;
3. A map of suitable scale should be provided;
4. Included detailed steps for the response, reporting, containment and cleanup from spills;
5. Identify the inside location of MSDS and spill kits, include the contents of the spill kits;
6. Include an Emergency Contact List;
7. Include a NT/NU Spill Report form (available on NWB ftp); and
8. Part H, Item 1 of the Licence also requires the plan to address comments received by INAC, GN-DOE and EC in the review process (available on NWB ftp).

Following receipt of the revised plan the NWB will distribute the plan for a public comment period prior to a Board Decision. Should you have any questions on what the NWB is looking for, I am available by return email or at the number below.

Thanks,

Don
