To: g.chicoyne@construction-nq.com, l.lessard@construction-nq.com

Cc: Licensing Department <licensing@nwb-oen.ca>

Dear Mr. Chicoyne:

After a preliminary technical review of the Water Licence Application, the Application is deemed incomplete and the following issues should be addressed in order to proceed with the Licensing process: 1) Missing fees; 2) Scope of the Application and inconsistency between documents; 3) Application completeness; 4) GN authorization.

The Application will proceed to the next stage only after you have submitted the required information, further to that NPC and NIRB conformity determination are also necessary.

Please, see below for further details.

1) MISSING FEES

Application fee

Water use fee

2) SCOPE OF THE APPLICATION AND INCONSISTENCY BETWEEN DOCUMENTS

Information between all documents that make up the Application package must be consistent including information in the Water Licence Application, any supporting plans as well as the executive summary.

The scope of the Project is not clear. There is inconsistency between the Application form and the Summary of the Project.

Under Block 13 of the Application it is stated that “*The Water will be pumped into a newly made steel tank and transferred to 2 cleaned steel tank for testing*”

In the summary: “*The Water will stay in the tank for at least 24 hours. After the inspection..., the water will be discharged in the field.*”

How many tanks are involved in the operation and are they new or used tanks?

If you are testing used tanks the following information shall be provided:

1. tanks cleaning procedure , amount of water used in cleaning, method of disposal and location of waste and sludge to be disposed of

3) APPLICATION COMPLETENESS ISSUES

Block 1 of the Application is incomplete:

Provide a list of the officers of the company and a copy of the Certificate of Incorporation or evidence of registration of the company name.

Block 17 of the Application is blank: Predicted Environmental Impacts of the Undertaking and Proposed Mitigation Measures

The applicant must describe the environmental and resource impacts on, but not limited to, the following:

- • Groundwater and surface water including changes to flow, quantity and quality;
- • Land, including geologic structure change, soil contamination, compaction/settling/erosion, alteration of the permafrost regime and riparian zone loss;
- • Vegetation, including species composition and abundance, non-native species introduction, or accumulation of toxins/heavy metals (in relation to remediation objectives for closure); and
- • Aquatic ecosystem including fish, benthic invertebrates, and plankton

This includes a description of all proposed environmental management systems and monitoring programs for all significant impacts, and a description of all mitigations and/or remediation included in the application.

The applicant must provide information from and notice of any environmental screening or assessment completed on the project, including the determinations of significance and mitigation. If an environmental review was completed, reference screening decisions and project certificates, including terms and conditions.

Block 22 Financial Information is incomplete

- Provide a statement of financial responsibility
- provide a list of the officers of the company
- attach a copy of the Certificate of Incorporation or evidence of registration of the company name

Block 28 of the Application: signature

Provide an authorization letter confirming that you are signing on behalf of Nunavut Construction Limited

4) GN authorization

As expressed by the Proponent Nunavut Construction Limited (NCL) is under contract by GN to complete the Project. The Project will take place on Commissioners Land, the NWB requests the Proponent to provide a document from GN authorizing NCL to act on GN's behalf.

Should you have any questions regarding the above please, feel free to contact me at [867-979-3079](tel:867-979-3079)

Regards
Sonia
