Subject: 1BR-BAK---- Water Licence Application for the Baker Lake Landfarm Project
To: <SAyilara@gov.nu.ca>
Cc: <licensing@nwb-oen.ca>

Hello Sulaimon.

Thank you for providing the application for a water licence. We have performed the preliminary technical review of the documents, and the NWB requests following clarifications:

1. I understand the applicant is GN-PPD - is that correct?
2. The location coordinates are required to be in the degree-minute-second format as shown in the application form. Could you please provide them?
3. The application states GN will perform water treatment on the collected wastewater. Could you please provide the details on the process, such as any engineering drawings and quality of influent and effluent.
4. Where will the treated wastewater be released?
5. The application notes that the quantity of wastewater is estimated at 500 L. What is the time period, during which this volume will be generated?
6. The application sets August 31 as the start of construction. Please note that the time required for public review, information exchange, and Board decision will exceed that timeframe.
7. Could you please provide the Inuktitut summary?
8. Could you please provide a standalone spill contingency plan prepared in the format set out by the Consolidation of Spill Contingency Planning and Reporting Regulations R-068-93?
9. The application package included engineering drawings; however, the drawings are illegible. Could you please provide them in a better resolution?

Best regards,
