Hi Robert,

I greatly appreciate your reply. Jim Wilson from Nunatta Environmental Services will be taking the lead in completing all the necessary documents for PPD' application. I will forward you later today a formal letter authorizing Jim Wilson as the GN lead on this application.

As I have mentioned on a previous email I do hope you can delay the application so Jim can get up to date with the project and complete all of the required documents. PPD does want the to move ahead with this application and it is of utmost importance so we can move ahead and do a proper environmental clean up of the contaminated soil in Baker Lake.

I was copied on the email Mr. Andrew Kiem sent you regarding the application and comments. I have copied him as you will notice. Like I had mentioned to him it was of no ill will on our part.

Hope this will help in moving the completion application and of submission forward.

Best regards,

Bernard
