Subject: Bear Island Licence No. 1BR-BEA1015 - Document Review & Comments

Mr. Joseph,

The Nunavut Water Board (NWB) recently provided us with review results and comments on a couple of the documents we submitted for the Bear Island Remediation Project (Licence No. 1BR-BEA1015). The documents reviewed were:

- REMEDIATION OF BEAR ISLAND, NUNAVUT, OPERATIONS AND MAINTENANCE PLAN FOR THE SEWAGE DISPOSAL FACILITIES
- REMEDIATION OF BEAR ISLAND, NUNAVUT, SPILL CONTINGENCY PLAN

As detailed in your letters we submitted these documents on June 15, 2010 and did not receive your response/comments until September 27, 2010. By the time we received your comments the majority of the work at the site had been completed and as of now all site works are complete except for the demobilization and final closure of the camp facilities.

As a result of this time line many of the comments received on the documents we submitted are no longer applicable as the work item is complete and/or it is no longer possible for us to address these issues. Considering this how should we address the comments that are no longer applicable?

Thanks for your time and attention to this matter.

Sincerely,

Mark Yetman
