**Re: Water Use License Application - File number 1BR-BER
Supplemental Information for Landfarming Activities
Bernard Harbour PIN-C Contaminated Site Remediation Project, Kitikmeot, Nunavut**

Crown-Indigenous Relations and Northern Affairs Canada (CIRNAC) is submitting the enclosed Supplemental Information for Landfarming Activities associated with the remediation of the PIN-C, Bernard Harbour Former Intermediate Distant Early Warning (DEW) Line site as indicated in our April 29, 2025 submission. As there will be some on-site landfarming to treat a small volume of moderately petroleum hydrocarbon contaminated soil, CIRNAC is submitting a Supplemental Information form and supporting Contaminated Soil Treatment and Wastewater Management Plans to support our application for New Class B license.

We trust that this and the information is satisfactory for your requirements. If you have any questions or comments, please contact the undersigned or Charlotte Lamontagne at charlotte.Lamontagne@rcaanc-cirnac.gc.ca

Sincerely

Peter G. Martin,
Project Manager, Contaminated Sites Program, Nunavut
