**Re: Application exempt from Screening pursuant to Section 12.4.3 of the NLCA:
Defense Construction Canada's "PIN-4, Byron Bay Site Remediation" project**

Dear Jeff Mercer:

On January 12, 2010 the Nunavut Impact Review Board (NIRB or Board) received an application from Indian and Northern Affairs Canada (INAC) for an extension to Land use Permit N2007X0007 for Defense Construction Canada's "PIN-4, Byron Bay Site Remediation" project.

Please be advised that the original project proposal (NIRB File No.: 07DN010) was received by the NIRB from INAC on February 12, 2007 and was screened by the Board in accordance with Part 4, Article 12 of the Nunavut Land Claims Agreement (NLCA). On March 29, 2007 the NIRB issued the enclosed NLCA 12.4.4(a) screening decision to the Minister of INAC indicating the proposed project could proceed subject to NIRB's recommended project-specific terms and conditions.

Additional authorizations associated with the project have also been reviewed by the NIRB following screening of the original project proposal. In each instance the NIRB confirmed that the applications were exempt from further screening pursuant to Section 12.4.3 of the NLCA and the activities therein remained subject to the terms and conditions recommended in the original March 29, 2007 Screening Decision Report.

Authorization	Application			Correspondence Issued by NIRB
	Date Received by NIRB	Type	Reason for Application	
Quarry Permit	April 29, 2008	Re-issue	Unable to mobilize in 2007	May 6, 2008
Land Use Permit	January 5, 2009	Extension	Continue remediation	January 12, 2009

Quarry Permit	January 21, 2009	Extension	No material extracted	February 3, 2009
Land Use Permit	October 30, 2009	Extension	Continue remediation	November 6, 2009

The current INAC application, the original NIRB Screening Decision Report (07DN010) and related file information are available from the NIRB's ftp site at the following link: <http://ftp.nirb.ca/01-SCREENINGS/COMPLETED%20SCREENINGS/2007/07DN010-DCC-PIN-4/>.

PREVIOUSLY-SCREENED PROJECT PROPOSAL:

As previously screened by the NIRB (File No. 07DN010), the "PIN-4, Byron Bay Site Remediation" project was located within the Kitikmeot region, approximately 150 kilometres (km) west of Cambridge Bay. The Proponent indicated that it intended to clean-up and remediate the former Distant Early Warning (DEW) Line site.

The activities/components associated with this proposal included:

- Demolish and remove existing facilities which are not required for the operation of the North Warning System
- Disposal of contaminated soils
- Stabilize existing landfills
- Air transportation to and from the site
- Marine transportation of bulk materials and equipment to and from site via sea-lift or barge
- Use of existing airstrip and roads at site
- Clean up surface debris
- Construction of a non-hazardous waste landfill
- Construction of a Tier II Soil Disposal Facility
- Construction of temporary clean up camp-site for up to 60 persons, and demobilization of campsite at end of project life
- Establishment of sewage lagoon for camp-site
- Hazardous waste storage and disposal
- Fuel storage
- Quarrying activity
- Consumption of water and generation of wastes.

CURRENT APPLICATION:

Defence Construction Canada is currently proposing to extend Land Use Permit N2007X0007 to the end of the 2011 construction season to complete:

- Contaminated soil excavation and disposal
- Excavation of remaining landfills scheduled for removal
- Re-grading
- Demolition of the garage and warehouse
- Final closure and capping of the Non-Hazardous Waste Landfill and Tier II Soil Disposal Facility
- Closure of the sewage lagoon.

Please note that Section 12.4.3 of the NLCA states that:

“Any application for a component or activity of a project proposal that has been permitted to proceed in accordance with these provisions shall be exempt from the requirement for screening by NIRB unless:

(a) such component or activity was not part of the original project proposal; or

(b) its inclusion would significantly modify the project.”

After completing a review of the information provided in support of the current application, the NIRB is of the understanding that the proposed extension does not change the general scope of the original project activities, and the exceptions noted in NLCA 12.4.3(a) and (b) do not apply. Therefore, this application is exempt from screening as per Section 12.4.3 of the NLCA and the activities therein remain subject to the terms and conditions recommended in the original March 29, 2007 Screening Decision Report (enclosed).

If you have any questions or concerns, please contact Tara Arko, Assistant Technical Advisor, at 867-983-4611 or tarko@nirb.ca.

Sincerely,

Stephanie Autut
Executive Director
