Re: Application exempt from Screening pursuant to Section 12.4.3 of the NLCA: Defense Construction Canada's "PIN-2, Cape Young DEW Line Site Clean-up and Remediation" project

Dear Jeff Mercer:

On January 11, 2010 the Nunavut Impact Review Board (NIRB or Board) received an application from Indian and Northern Affairs Canada (INAC) for an extension to Land Use Permit N2008X0037 for Defense Construction Canada's "PIN-2, Cape Young DEW Line Site Clean-up and Remediation" project.

Please be advised that the original project proposal (NIRB File No.: 08DN081) was received by the NIRB from INAC on November 5, 2008 and was screened by the Board in accordance with Part 4, Article 12 of the Nunavut Land Claims Agreement (NLCA). On December 18, 2008 the NIRB issued the enclosed NLCA 12.4.4(a) screening decision to the Minister of INAC indicating the proposed project could proceed subject to NIRB's recommended project-specific terms and conditions.

The current INAC application, the original NIRB Screening Decision Report (08DN081) and related file information are available from the NIRB's ftp site at the following link: <http://ftp.nirb.ca/01-SCREENINGS/COMPLETED%20SCREENINGS/2008/08DN081-DCC%20-%20PIN-2/>.

PREVIOUSLY-SCREENED PROJECT PROPOSAL:

As previously screened by the NIRB (File No. 08DN081), the "PIN-2, Cape Young DEW Line Site Clean-up and Remediation" project was located within the Kitikmeot region, approximately

150 kilometres (km) from Kugluktuk. The Proponent indicated that it intended to clean-up and remediate the former Distant Early Warning (DEW) Line site.

The activities/components associated with this proposal included:

- Demolition of existing facilities;
- Remediation of existing landfills;
- Construction of two new landfills;
- Excavation of contaminated soils;
- Removal of surface debris;
- Grading and restoration of land surfaces;
- Installation of a construction camp to accommodate up to 60 people
 - Average of 50 people on site at one time
 - Peak number of people on site from mid-July to late August
- Use of existing airstrip and roads for equipment transport, movement and access to work areas;
- Quarrying;
- Use of heavy machinery (excavators, tractors, loaders, etc.)
- Storage and offsite disposal of hazardous contaminated soils and hazardous waste;
- Construction of Tier II soil disposal facility; and
- Site monitoring following remediation.

CURRENT APPLICATION:

Defence Construction Canada is currently proposing to extend its Land Use Permit N2008X0037 through the 2011 construction season to complete:

- Final closure
- Capping of the Non-Hazardous Waste Landfill and Tier II Soil Disposal Facility
- Reshape borrow areas
- Complete closure of the sewage lagoon
- Excavate last area of contaminated soil.

Please note that Section 12.4.3 of the NLCA states that:

“Any application for a component or activity of a project proposal that has been permitted to proceed in accordance with these provisions shall be exempt from the requirement for screening by NIRB unless:

(a) such component or activity was not part of the original project proposal; or

(b) its inclusion would significantly modify the project.”

After completing a review of the information provided in support of the current application, the NIRB is of the understanding that the proposed extension does not change the general scope of the original project activities, and the exceptions noted in NLCA 12.4.3(a) and (b) do not apply. Therefore, this application is exempt from screening as per Section 12.4.3 of the NLCA and the

activities therein remain subject to the terms and conditions recommended in the original December 18, 2008 Screening Decision Report (enclosed).

If you have any questions or concerns, please contact Tara Arko, Assistant Technical Advisor, at 867-983-4611 or tarko@nirb.ca.

Sincerely,
