Attention: Phyllis Beaulieu, Manager of Licensing

Dear Phyllis:

Reference: Chesterfield Inlet Fuel Facility – Landfarm Water Licence Application Cover Letter

On behalf of the Government of Nunavut, Community and Government Services, we are pleased to submit the following Water Licence Application. Stantec is in the process of completing upgrades to the existing Bulk Fuel Facility in Chesterfield Inlet which involves removal and remediation of petroleum contaminated soils. The following Water Licence Application form and attached documents detail the planned landfarm.

A summary of the proposed landfarm and Water Licence Application have been attached in both English and Inuktitut.

As the project has been awarded to a contractor, with the construction phase to begin in July 2012, we have attached *Issued for Tender* drawings signed and stamped by an engineer registered to practice in Nunavut.

Similarly, a *Spill Contingency Plan, Operation and Maintenance Plan, and Interim Abandonment and Restoration Plan* are attached for submittal to the NWB for the proposed landfarm facility.

We hope that the attached documents meet your requirements at this time and request that the water licence be issued accordingly. If you require any further information or have questions, please do not hesitate to contact me.

Respectfully,

STANTEC ARCHITECTURE LTD.
