### A. BACKGROUND INFORMATION

On May 11, 2012 the Board provided notification to Aboriginal Affairs and Northern Development Canada (AANDC) that GN-CGS had submitted a new water licence application 1BR-CIL1214 detailing complete upgrades to the existing landfarm and the removal of 150 cubic metres of hydrocarbon contaminated soil.

On February 2, 2013 the NWB received an amendment application to extend the current landfarm and to remediate 450 cubic metres of contaminated soil that has exceeded the original estimate authorized in the previous license.

Interested parties were requested to review the information and provide comments by November 15, 2014.

### B. RESULTS OF REVIEW

On behalf of AANDC, the following comments are submitted to the Nunavut Water Board for consideration:

#### 1. Application For Water License Amendment

AANDC is satisfied at this time that the planned construction of extension to the landfarm will meet both the current and future needs of the Hamlet, while also ensuring that there are limited or no impacts to water or the environment.
