NWB Annual Report Year being reported: 2024

License No: 1BR-CL11727 | Issued Date: May 26, 2017 | Expiry Date: May 25, 2027

Project Name: PIN-B Clifton Point Long Term Monitoring

Licensee: Crown-Indigenous Relations and Northern Affairs Canada

(CIRNAC) Contaminated Sites

Mailing Address: Nunavut Regional Office

969 Sivumugiaq St. Iqaluit, NU X0A 3H0

Name of Company filing Annual Report (if different from Name of Licensee please clarify relationship between the two entities, if applicable):

N/A

General Background Information on the Project (*optional):

PIN-B Clifton Point is located on the coast of Amundsen Gulf (Beaufort Sea) in Nunavut. The nearest communities are Paulatuk, Northwest Territories (NT), about 220 km to the northwest, and Kugluktuk, Nunavut about 220 km to the southeast. The site is situated about 1 km inland from the coast. PIN-B was an Intermediate DEW Line Site constructed in 1957 and subsequently closed and abandoned in 1963.

Remediation works were conducted at the site between 2009 and 2010, including consolidation and off-site disposal of hazardous soils and materials, demolition of buildings and structures, excavation and consolidation of wastes from various historical dumps and clean-up of other site debris. All of the non-hazardous wastes were placed in a non-hazardous waste landfill (NHWL) constructed on-site for that purpose.

As per departmental commitments to monitor the NHWL post-closure, a 25-year long term monitoring (LTM) program was initiated at PIN-B in August 2011 and includes visual inspections, groundwater sampling, soil sampling (as required), and natural environment monitoring. Refer to the PIN-B Clifton Point Long Term Monitoring Plan (2011, 2017) for additional information.

Years 1, 3, 5, 7, and 10 of the LTM Plan took place in 2011, 2013, 2015, 2017, and 2020 respectively. Future events are scheduled for 2025, and 2035.

	Part B	m 1 🔻						
			al activities, including, but not limited					
obtaining water; sewage and greywater management; drill waste management; solid and hazardous waste management.								
\	Water Source(s):	Monitoring Wells	at NHWL (See GPS Coordinates Page)

Licence Requirements: the licensee must provide the following information in accordance

with

Povision	s to the Abandonment and Restoration Plan
EVISION	N/A - not applicable
	Additional Details:
rogress	sive Reclamation Work Undertaken
	Additional Details (i.e., work completed and future works proposed)
	No progessive reclamation work was undertaken in 2024.
	As per the <i>PIN-B Clifton Point Long Term Monitoring Plan</i> (2011, 2017), future long term monitoring events are scheduled for 2025, and 2035.
Results (of the Monitoring Program including:
	The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitue each location where sources of water are utilized;
	Details attached
	Additional Details:
	Additional details regarding water sources can be found in the <i>PIN-B Clifton Point Long Term Monitoring Plan</i> (2011, 2017).
	The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitue each location where wastes associated with the licence are deposited; Not Applicable (N/A)
	Additional Details:
	Remediation was completed in 2010 and the only structure remaining on site is the NHWL. No waste was deposited on site in 2024. Any solid waste generated was removed from site at the completion of monitoring activities.
	Results of any additional sampling and/or analysis that was requested by an Inc
	No additional sampling requested by an Inspector or the Board
	Additional Details: (date of request, analysis of results, data attached, etc)
	N/A

No additional sa	mpling requested by an Inspector or the B	Board
Additional De	tails: (Attached or provided below)	
N/A		

Any responses or follow-up actions on inspection/compliance reports

Inspection Report received by the Licensee (Date):

Additional Details: (Dates of Report, Follow-up by the Licensee)

The last known inspection conducted at PIN-B was in 2010. The 2010 Inspection Report is available on the NWB ftp site. The majority of issues were identified during remediation and no issues remain applicable to post-remediation monitoring activities.

Any additional comments or information for the Board to consider

Physical observations of the NHWL and results of groundwater chemical analysis conducted during the last LTM event (2020) indicate that the NHWL at PIN-B is in acceptable condition, is performing as designed, and is containing the enclosed waste.
