### **Recommendations/Comments**

After reviewing the Spill Contingency Plan for Clifton Point Pin B, INAC is satisfied that the plan meets the requirements of Part I of the Water License 1BR-CLI0914.

INAC however reminds the proponent that at any time if the operation and/or technology involved in the plan changes for any reason; then an updated Spill Plan must be submitted to the NWB as per Part I item 2 of the Water License.

Indian and Northern Affairs Canada are required to provide the Nunavut Water Board all outstanding information referred to above in order to comply with the requirements of the Spill Contingency Plan for Water License 1BR-CLI0914.
