Dear Peter Martin and Erika Solski,

I am a Nunavut Water Board technical advisor in charge of 1BR-CLR1419 (Contwoyto Lake Weather Station remediation site). I am looking into the cancellation application filed by INAC.

I was wondering if there was any work done on-site in 2017, as there have been no annual reports filed for that period. In addition, there was a recommendation in Arcadis' Completion Report, as well as an inquiry from INAC Water Resources, to collect and analyze surface water samples to monitor for exceedance in metals. Previously, INAC Contaminated Sites indicated that there were no further plans for long-term monitoring of the site, but did not address the situation with surface water sampling.

The other recommendation regarding the monitoring of regraded lands was positively addressed by the Inspector in her 2017 water licence inspection report.

Regards,

Assol Kubeisinova- ᠠᠰᠣᠯ ᠬᠤᠪᠡᠰᠢᠨᠣᠪᠠ
