

ANNUAL REPORT FOR THE HAMLET OF CLYDE RIVER OLD TOWN REMEDIATION PROJECT, 2018

YEAR BEING REPORTED: 2018

The following information is compiled pursuant to the requirements of Part B, Item 1 of Water Licence # 1BR –CLY 1828 issued to the Hamlet of Clyde River Old Town remediation Project.

- i) - iii) tabular summaries of all data generated under the “Monitoring Program”; monthly and annual quantities in cubic metres of freshwater obtained from all sources; monthly and annual quantities in cubic metres of each and all wastes discharged; Attached are quantities of water used as reported in our On Tap Water Delivery System and the estimated discharge of sewage waste based on quantities used...?

| Month Reported | Quantity of Water Obtained from all sources (litres) | Quantity of Sewage Waste Discharged (Estimated) |
|---------------------|--|---|
| January | | Same |
| February | | Same |
| March | | Same |
| April | | Same |
| May | | Same |
| June | | Same |
| July | | Same |
| August | | Same |
| September | | Same |
| October | | Same |
| November | | Same |
| December | | Same |
| ANNUAL TOTAL | | |

Note: No water consumption under this licence. This item is not applicable.

ANNUAL REPORT FOR THE HAMLET OF CLYDE RIVER OLD TOWN REMEDIATION PROJECT, 2018

- iv. A summary of modifications and/or major maintenance work carried out on the Water Supply and Waste Disposal Facilities, including all associated structures and facilities;

No modification or maintenance work was carried out during the reporting year.

- v. A list of unauthorized discharges and summary of follow-up action taken;

There is a surface runoff channel at the middle of the contaminated area. Leachate is uncontrolled.

- vi. A summary of any abandonment and restoration work completed during the year and an outline of any work anticipated for the next year;

No abandonment and restoration work was conducted during this reporting year. A consultant is engaged for the feasibility of the Community Solid waste Management. Following this study, design will be started for the new site and a decommissioning plan will be developed of the existing waste sites and also plan for the old town soil remediation.

- vii. A summary of any studies requested by the Board that relate to waste disposal, water use or reclamation, and a brief description of any future studies planned;

Practically no physical work was carried out during this reporting period.

- viii. Any other details on water use or waste disposal requested by the Board by November 1st of the year being reported; and

This contaminated site is anticipated to be remediated along with the existing Municipal wastes sites.

- ix. Updates or revisions to the approved Operation and Maintenance Plans.

The old town soil remediation site is non-engineered. However, a remediation plan has been developed by the consultant Stantec few years ago. The project was on hold until 2018.

- x. **ADDITIONAL INFORMATION THAT THE LICENSEE DEEMS USEFUL:**

The extended sampling and testing program were already started. We are waiting for the completion of the feasibility study of the Municipal wastes sites. Once completed,

**ANNUAL REPORT FOR
THE HAMLET OF CLYDE RIVER OLD TOWN REMEDIATION PROJECT, 2018**

remediation plan of this project will be activated.

xi. FOLLOW-UP REGARDING INSPECTION/COMPLIANCE CONCERNS:

GN –CGS is the Licensee. We are working very closely with CIRNAC inspector to keep the water licence into compliancy.

This is an active water licence.

The Test Lab Results for 2018 are submitted in a separate document.
