Re: Cambridge Bay Soil and Water Treatment Facility Renewal 1BR-CST1723

Kitikmeot Environmental Ltd. (KEL) has submitted a General Water License Application Renewal for the Cambridge Bay Soil and Water Treatment Facility, currently located adjacent to the Hamlet of Cambridge Bay, Nunavut and operating under approval 1BR-CST1723. This facility operates to accept soil and water/snow impacted with petroleum hydrocarbons from commercial, industrial and residential spill sites and remediation projects in the Cambridge Bay area. KEL is proposing to renew operations the facility for an additional five years.

Providing a location for the treatment of impacted soil and water has a positive impact on the community and the environment. The treated soil is provided to the community for beneficial reuse at no charge to the Hamlet. As such, the Hamlet continues to support the project and recommends the Nunavut Water Board approve the renewal application.

Best Regards,

Jim MacEachern
