RE: Licence No. 1BR-CST1723, Type “B” – Submission of For-Construction Drawing for the Cambridge Bay Soil and Water Treatment Facility Project

Dear Mr. Foster:

The Nunavut Water Board (NWB or Board) received on July 10, 2017, from Kitnuna Environmental Ltd., a copy of the for-construction drawings developed for the Cambridge Bay Soil and Water Treatment Facility Project as required by the relevant terms and conditions included in the Licence issued to the Project.

Following receipt and an initial preliminary review, the NWB distributed the drawings on July 14, 2017 for information purposes. However, prior to the date and time that this correspondence was issued, no comments and/or recommendations were received for interested parties with respect to the drawings submitted in support of the project.

The NWB conducted a full review of the submission, which determined that the drawings are satisfactory and consistent with the requirement under Part H, Item 1 of Type “B” Water Licence No. 1BR-CST1723. The Licensee should note, however, that it has an obligation to provide to the Board for review as-built plans and drawings following construction of the facility.

Should you have any questions, please contact the NWB Licensing Department by email to licensing@nwb-oen.ca or phone at (867) 360-6338.

Regards,

Richard Dwyer
Licence Administrator
