Subject: RE: Cullaton Water Licence
Hi Rita

I will submit the application with the annual report, which I will try to have done before March 31. Did you receive any comments on the report I submitted last fall on the reclamation work? The annual report will draw heavily on that report and I am wondering if there is anything I need to change or correct.

Thanks for the help.

Vernon

Hi Vernon,

Please find attached our standard application. The procedure is the same as with the renewal in 1999. However, along with this application form, please provide the status report of where the reclamation is at. This year-end report is not due till March 31st, so you may want to hold off with your applicaiton till then, or you may want to submit your year-end report early if you want to get your application in already.

Therefore, for a complete application, we need the following:

- application form
- status report
- executive summary of the application in BOTH English AND Inuktitut
- \$30 application fee payable to the Receiver General for Canada
- any other relevant information including maps and drawings (max size 11" x 17")

Please note that we prefer to receive as much as possible (i.e. not the fee) of the application by e-mail to my address.

If you have any other questions, please let Dionne or myself know.

Rita
