**Re: 1BR-DYE0409 – Annual Report, 2008 – Defense Construction Canada
– Dye-M Dew Line Site, Cape Dyer Project**

Please be advised that Indian and Northern Affairs Canada (INAC) has completed a review of Defense Construction Canada Type “B” Water License 2008 Annual Report for the Dye-M Dew Line Site. The NWB circulated the Report for information purposes only, on April 16, 2009. All associated documents related to this license posted on your ftp site under 1BR-DYE were included in my review (see attached Technical Review Memo).

Should you have any questions or comments, please do not hesitate to contact me at (867) 975-4738 or by email at Andrea.Cull@inac.gc.ca.

Yours truly,

Re: **1BR-DYE0409 – Annual Report, 2008 – Defense Construction Canada
– Dye-M Dew Line Site, Cape Dyer Project**

The 2008 Annual Report satisfactorily addressed all of the requirements of Part B, Item 1 of the current water licence #1BR-DYE0409.

It was noted during a review of the report that a sample taken of the discharge from the off-line sewage lagoon exceeded criteria stated in the water license. The pH of the effluent was reported at 10.49 (max criteria – 9.0). The incident was reported via the NT Nu 24 Hour Spill Line – Report # 08-406. Therefore it is recommended that a Water Resources Officer conduct a site inspection at this facility during the 2009 field season. This information has been forwarded to INAC's Field Operation Division.
