| 4. DESCRIPTION OF UNDERTAKING (attach plans and drawings) The amendment requested is to the design of the landfarm, specifically we would like to expand it and relocate the eastern berm. The reasons for this request are outlined below: 1) We need to expand the landfarm because we have identified additional areas of hydrocarbon contaminated soil that require treatment. If we were to add this soil to the current landfarm it would be filled above capacity and the treatment results would be negatively impacted. 2) We need to move the eastern berm inward due to the fact that this berm has shifted. Moving this berm away from the slope should prevent any further movement (see attached drawing for details). | | | |
