Phyllis,

Unfortunately, we do not have as-built drawings available. Engineers typically do not monitor the construction of short-term temporary works to the level of detail required to produce stamped as-built drawings. The River Crossings we installed were removed at the end of the 2006 and 2007 field seasons and will be reinstalled and removed again in 2008.

Since we are unable to produce as-built drawings for River Crossings #1 and #2, I have attached some photographs of the completed construction from the 2007 field season. I hope that these in combination with the construction drawings provided will be sufficient.

Please let me know if you need anything else.

Thanks,  
Mark

Thank you for your quick response. Also, as part of that same amendment was the requirement to quote "The Licensee shall submit for Board approval 60 days after construction of the proposed culvert design for River Crossings

#1 and #2, as-built drawings stamped by an Engineer and field decisions made during construction that deviate from the proposed plans and any data used to support the changes." unquote. Would you happen to have this data available?

Thank you.

Phyllis,

Please find attached the construction drawings for River Crossings #1 and #2. If you require anything else please let me know.

Thanks,

Under the terms and conditions of the emergency amendment issued to Indian and Northern Affairs on August 18, 2006, there was a requirement for the submission of as-built drawings once construction was completed. Attached is a copy of that amendment. According to my records these drawings have not been received. Please advise.
