Re: NWB5EKA0406 - Spill Contingency Plan

On behalf of Indian and Northern Affairs Canada (INAC), I would like to thank the Nunavut Water Board (NWB) for the opportunity to provide comments on the Spill Contingency Plan for the cleanup of the FOX-C Intermediate DEW Line Station Site. The report presented was prepared by Western Region, Environmental Services, Architectural & Engineering Services, Real Property Services and Public Works and Government Services Canada as per Part F, item 1 of water licence NWB5EKA0406 (the current licence), on behalf of the Department of Indian Affairs and Northern Development (the Licensees).

A review of the plan was conducted by Water Resources. We have determined that the Contingency Spill Plan meets our requirements. One recommended addition is to add the date the plan was prepared to the posted document.

If you have questions or concerns, please do not hesitate to call.

Best regards,
