Gjoa Haven, NU X0B 1J0

Dear Ms. Beaulieu:

Re: 2005 Annual Report: Water Use License NWB5FRA0209

UMA Engineering Ltd. is pleased to submit this annual letter report as per the requirements of Part B.1 of Water Use License NWB5FRA0209. The report was prepared on behalf of Defence Construction Canada and the Department of National Defence.

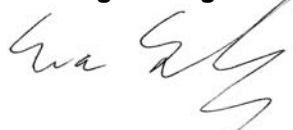

The work completed in 2005 included landfarm closure and demobilization of the remaining camp equipment. PCB contaminated materials, which are currently in an Environment Canada approved and registered Temporary PCB Storage Area, are awaiting removal by a hazardous waste contractor. The storage area is located within the NWS operational area (immediately south of the airstrip, next to the Tier II Soil Disposal Facility).

As per the monitoring plan submitted to the NWB in March 2005, we are also submitting the enclosed *DEW Line Clean Up Project PIN-3 Lady Franklin Point Baseline Landfill Monitoring* report.

We trust the information provided is consistent with the requirements of Water Use License #NWB5FRA0209. Please feel free to contact the undersigned if you have any questions or comments.

Sincerely,

UMA Engineering Ltd.
