Dear Deon:

Re: 2005, 2006 and 2007 Annual Reports for License 1BR-SHE0510

UMA Engineering Ltd. is providing the following clarifications to the comments in your letter dated October 22, 2008 regarding the above-noted annual reports. The clarifications are being provided on behalf of Defence Construction Canada (DCC) and the Department of National Defence (DND).

Regarding comments 1-3, there was no water used, no sewage deposited and no materials deposited in the Solid Waste Disposal Facilities. The facilities, including the landfarm, Non-hazardous Waste Landfill and Tier II Soil Disposal Facility were constructed specifically for use during the clean up of the PIN-3 site and were closed upon completion of the work in 2005. These facilities are no longer in use and no additional materials are being placed, therefore, there are no quantities of materials to report. The annual reports submitted provide a summary of the landfill performance based on the engineering and environmental observations and data collected.

Regarding the potential seepages noted in the report, additional information is presented in the 2007 annual report, which was submitted to the NWB on July 21, 2008.

We trust the information provided is sufficient. Please feel free to contact the undersigned, or Douglas Craig with DCC (613-998-7288) if you have any additional questions or comments.

Sincerely,

UMA Engineering Ltd. doing business as AECOM
