RE: Hope Lake Remediation (1BR-HLR1314)

Dear Charlotte,

A final inspection was conducted at the Hope Lake airstrip in respect of the above-listed water licence on July 16, 2015. It was determined that conditions of Part J (Abandonment and Restoration) of the licence have been met.

No annual report for 2014 is available on the Public Registry. Please ensure that reporting requirements of this licence are met, and please clarify in the annual report whether any post-closure monitoring will be required at this site.

When the NWB is satisfied that reporting with respect to this licence is complete, cancellation may be contemplated. No further inspection is required unless further activity on-site is required.

Regards,

Eva Paul
