RE: Licence No 1BR-IAG1924 Installation and Groundwater Sampling at Iqaluit Airport Project,
Transport Canada, 2019

Please note, per communication requested from Reid Campbell, Regional Environmental
Advisor, Environmental Programs, Prairie and Northern Region Transport Canada /
Government of Canada, we are providing the following statement regarding the field sampling
QC for the above mentioned project.

While Eurofins Lancaster Laboratories Environment Testing LLC (ELLE) cannot provide
approval for field sampling plans, we can comment that the indicated planned frequency of field
QC samples, as applicable to soil and groundwater related parameters in general, is in line with
the frequency of analysis of QC samples (for soil and groundwater analyses) in our laboratories.

Please let me know if you need anything further on this topic.

Sincerely,

Dorothy M. Love
Director
Quality Assurance
