**Re: Clarification on Disposal of Tank from the Drum Cache**

---

Mr. Lécureur,

The purpose of this letter is to respond to the question about the disposal of the tank from the drum cache. Authorisation was sought from the City of Iqaluit to dispose of the tank in their landfill. They accepted to dispose of the tank with the condition that the tank be cleaned and cut up prior to being brought to the landfill. This was done to the satisfaction of the receiver at the landfill. You will find attached the confirmation from the city that they would dispose of the tank in their landfill. You will also find attached the receipt from the City of Iqaluit Landfill for the disposal of the tank.

Should you have any additional questions please do not hesitate to contact me.

Sincerely,

**Greg Johnson**  
Project Director
