Dear Mr Richard / The Licensing Department,

Thanks for your email below which was in response to AECOM's Water Licence amendment request, **on behalf of INAC**, dated August 08, 2017 (ref 60515379 (600)) and submitted to your office. Please note that we have made a couple of changes to this application and INAC, through this email and the document attached, is now submitting the same amendment request to your office directly. To enable NWB to have accurate information for the amendment, kindly pull the previous document of August 8, 2017, and please replace with the attached document.

No new supporting documents are attached as the same supporting documents attached to the application for the existing licence are still valid for the amendment being requested. Several documents including NPC conformity check not required statement, Environmental Screening report, Environmental Site assessment reports, Remedial Action Plan and so on were submitted with the existing licence.

INAC counts on you for the speedy processing of this amendment request. Should you require any further information to assist you in processing this application, please do not hesitate to contact the Director of Contaminated, Charlotte Lamontagne or the Project Manager, Dele Morakinyo using the details contained below or / and on the cover page of the attached document.

Thanks, in advance, for your cooperation.

Sincerely yours,

Dele Morakinyo, PhD., P.Eng.
