Hi Richard,

Thanks for this and apologies, I am currently on holiday however wanted to get back to you on this matter.

R-01

We will continue our efforts in groundwater monitoring at this site and all our sites as we have committed to do.

R-02

We follow standard QA/QC protocols for all of our monitoring events. Should you wish you see our plans, we are happy to share them with you. As we have a different contract each year we monitor, we let the contractor customize their approach to the industry approved practice. In addition to this, we ensure to use a CALA accredited laboratory. For pH and conductivity, we measure it in-situ as well as when the samples are sent to the laboratory. We will take this recommendation under consideration.

Again, apologies for the tardiness in responding.

Charlotte
