NWB Annual Report Year being reported: 2025

License No: BR- KEI2245 (Formerly 1BR-KEI1722) Issued Date: July 28, 2022 Expiry Date: July 27, 2045

Project Name: CAM-E Keith Bay Long Term Monitoring

Licensee: Crown-Indigenous Relations and Northern Affairs Canada

(CIRNAC) Contaminated Sites

Mailing Address: Nunavut Regional Office

969 Sivumugiaq St. Iqaluit, NU X0A 3H0

Name of Company filing Annual Report (if different from Name of Licensee please clarify relationship between the two entities, if applicable):

N/A

General Background Information on the Project (*optional):

The CAM-E Keith Bay site—located at 68°15.37' N, 88°10.42' W—is approximately 75 kilometers (km) east of Kugaaruk, Nunavut on the eastern side of the Simpson Peninsula.

CAM-E Keith Bay was an Intermediate Distant Early Warning (DEW) site constructed by the Department of National Defense (DND) in 1957 and deactivated in 1963.

Remediation of the CAM-E site occured between 2016 and 2018. A non-hazardous waste landfill (NHWL) and Tier II Facility were constructed to contain non-hazardous material, and Tier II soil, respecitively. During construction, seven (7) groundwater monitoring wells were installed around the perimeter of the NHWL and Tier II Facility.

As per departmental commitments to monitor the NHWL post-closure, a 25-year long term monitoring (LTM) program was initiated at CAM-E in 2020 and includes visual inspection, groundwater sampling, thermal monitoring, soil sampling (as required), and natural environment monitoring. Refer to the CAM-E (Keith Bay) Long Term Monitoring Plan (2019, addendum 2020) for additional information.

Years 1 and 3 of LTM took place in 2020 and 2022. Year 5 of LTM was scheduled for 2024, but we were unable to land on site due to weather. Future events will occur in 2026, 2029, 2034, 2039, and 2044.

Progressiv	re Reclamation Work Undertaken
	Additional Details (i.e., work completed and future works proposed)
	No progessive reclamation work was undertaken in 2025. As per the CAM-E (Keith Bay) Long Term Monitoring Plan (2019, addendum 2020), Year 5 was scheduled for 2024, but due to weather we
	were unable to land on site to carry out the LTM site visit. Future events are scheduled for 2026, 2029, 2034, 2039, and 2044. (Years 7, 10, 15, 20, and 25 respectively).
Results of	the Monitoring Program including:
	The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitude) of each location where sources of water are utilized:
	Details attached
	Additional Details:
	Additional details regarding water sources can be found in the CAM-E (Keith Bay) Long Term Monitoring Plan (2019, addendum 2020).
	The GPS Co-ordinates (in degrees, minutes and seconds of latitude and longitude) of each location where wastes associated with the licence are deposited;
	Not Applicable (N/A) ▼
	Additional Details:
	Remediation was completed in 2018 and the only structures remaining at the site are the NHWL and Tier II Facility. No waste was deposited on site in 2025. Any solid waste generated is removed from the site at the completion of LTM activities.

Results of any additional sampling and/or analysis that was requested by an Inspector

No additional	sampling requested by an Inspector or the Board		
Additional D	etails: (date of request, analysis of results, data attached, etc)		
N/A			
Any other details on wat being reported.	er use or waste disposal requested by the Board by November 1 of the year		
No additional	sampling requested by an Inspector or the Board		
Additional D	etails: (Attached or provided below)		
N/A			
Any responses or follow	-up actions on inspection/compliance reports		
	No inspection and/or compliance report issued by INAC ▼		
_Additional D	Additional Details: (Dates of Report, Follow-up by the Licensee)		
N/A			
Any additional comment	s or information for the Board to consider		
Physical c	observations of the NHWL conducted during the 2022 LTM event lat the NHWL and Tier II Facility at CAM-E are in acceptable and are performing as designed to contain the enclosed waste.
