Mr. Stuart Rostant
Kitikmeot Region Project Officer
Department of Community Government Services
Government of Nunavut

Dear Mr. Rostant

Subject Revision to Report Entitled "Kugaaruk Landfarm Facility - 2011 Annual Report"

Please discard the previous version of the report entitled "Kugaaruk Landfarm Facility – 2011 Annual Report", document no. 0222880805-REP-V0008-01, prepared by Tetra Tech WEI Inc. (Tetra Tech) for the Government of Nunavut Department of Community and Government Services (GN-CGS), dated September 2012; which is to be replaced by the enclosed revised report with the same title, document no. 0222880805-REP-V0008-02, prepared by Tetra Tech for the Government of Nunavut Department of Community and Government Services, dated December 2012.

In document no. 0222880805-REP-V0008-01, the Soil Petroleum Hydrocarbon Laboratory Analytical Results table (Table 2) shows the environmental quality guideline concentration for petroleum hydrocarbon (PHC) fraction F2 to be 260 mg/kg (the Government of Nunavut applicable guideline); however, our request for a site-specific variance to increase the guideline to 1000 mg/kg (since the treated soil will be used as cover material for the local landfill) was accepted by the Government of Nunavut Department of Environment (DoE). The revised report, document no. 0222880805-REP-V0008-02, includes a change to the environmental quality guideline for PHC fraction F2 presented in Table 2 which reflects the DoE site-specific variance, and an additional reference to the letter to Tetra Tech from DoE in the notes section at the bottom of Table 2. In addition, the letter from DoE is included as an additional appendix.

A copy of the revised report entitled "Kugaaruk Landfarm Facility – 2011 Annual Report", document no. 0222880805-REP-V0008-02, prepared by Tetra Tech for GN-CGS, dated December 2012 is attached to this letter.
