Our workload is very backed up at the moment and therefore I can't give you an answer as to when your license will be issued. You may want to speak with our senior tech, Dionne Filiatrault, who is looking after your file from a technical standpoint. Her email address is srtech@nwb.nunavut.ca and her phone number is 360-6338. There is no process within our organization for approval prior to issue of licenses.

Thanks for the update. Our client is hoping to start the soil remediation work in September of this year. The schedule hinges on whether the Water Licence is issued. Is there a chance that we would see a licence issued in time to start work in September? If not is there a process by which we could request approval to start hauling soil to the landfarm before the licence is issued?

Thanks

thank you. between the internet exchange which picks up alot of our emails and dumps them into the "junk mail" and my regular emails, I've finally managed to receive both english and inuktitut summaries.

Ms. Beaulieu:

Attached is the Project Summary in English. I have been advised that the translation was forwarded to your office directly by our client. Could you please confirm that you received the Inuktitut version? If there are any other questions or concerns, please have your staff contact me.

Thanks

I have received your re-submitted application for the above project and the only thing required so that I can send the file for review is an english and inuktitut summary. Your faxed cover indicated that originals and the application fee are being mailed. Please forward summaries via email to expedite this file.
