Re: Monitoring Plan and QA/QC Plan for FOX-2 (Longstaff Bluff) DEW Line Site

Dear Mr. Warren:

The Nunavut Water Board (NWB) has reviewed DCC submitted documents pertaining to the Monitoring Program and QA/QC Plan for the FOX-2 Dew Line Site. The NWB requests a response to each of the following:

- a. The NWB understands that the Monitoring Plan was conditionally approved on March 5, 2005. The applicant is reminded that the conditions in the approval letter have not yet been received by the NWB. When does applicant expect to submit the required information?
- b. Pursuant to Part J, Item 3 of the licence, the QA/QC Plan is to be "approved by an Analyst which addresses both field and laboratory requirements". Has this licence requirement been fulfilled? If so, documentation substantiating Analyst approval is to be submitted to the NWB. If not, this requirement of the licence is outstanding and the NWB requests an update on when Analyst approval will be obtained.

If you require assistance whatsoever please feel free to contact the undersigned at (867) 360-6338 or dirts@nunavutwaterboard.org.

Sincerely,

Original signed by:
