Good Afternoon,

The Nunavut Water Board received on January 12, 2011, from INAC the Plan entitled "CAPE CHRISTIAN LONG TERM MONITORING PLAN," dated February 10, 2009. On March 2, 2011, the NWB acknowledged receipt of the plan and determined that it was generally consistent with the requirements under Licence 1BR-LOR0813. In the March 2, 2011 communication, the Board required the Licensee to submit for review an addendum to the Plan in order to address issues raised by the intervening parties. More specifically, the 2017 addendum should address any needed revisions to the 2009 LTM plan, as well as address the following items:

- a. Include Mercury on the list of parameters outlined in section 2.1.1 of the Plan for which soil samples will be analyzed, as required in Table No. 1 under Licence 1BR-LOR0813;
- b. Remove and replace, accordingly, the reference being made to FOX-C on page 7 of the plan;
- c. Include in section 2.3 of the Plan the requirement to conduct a preliminary review of Phase 1 monitoring data at the end of the third year of monitoring; and d. Provide revised versions of the figures depicted in Appendix A, B, C and D of the Plan. The ones provided are not legible enough.
- e. Upon review of the monitoring data collected thus far, please confirm that the proposed Phased monitoring schedule remains unchanged (year "1" referring to 2011):
 - Phase I: years 1, 3 and 5.
 - Phase II (if required): Years 7, 10, 15 and 25
 - Phase III: beyond 25 years

Please do not hesitate to reach out with any follow-up comments/questions. Thanks,

Cynthia Ene, MBA, P.Eng. - ٧٩٢٤ ٤٤٨٧
