**Re:** Transport Canada, Iqaluit Airport Land Farm QA/QC Plan  
Nunavut Water Board Licence #1BR-LTU1013

Dear Mr. Molinski,

Exova Canada Inc. is in receipt of Transport Canada's QA/QC Plan for the Iqaluit Airport Land Farm, as noted above, and has performed a review of the Plan.

We are pleased to confirm our acceptance of the Plan for the analyses outlined in the Plan under licence #1BR-LTU1013.

The sampling plan with associated QC samples, suggested sample preservation, and selection of parameters are considered acceptable for the proposed analyses. Note that Exova Canada Inc. maintains laboratories across Canada accredited to ISO/IEC 17025 for specific parameters through the Standards Council of Canada (SCC) or the Canadian Association for Laboratory Accreditation (CALA).

Exova Ottawa, where the analyses are to be performed, is accredited for all parameter groups of interest under CALA. Exova is committed to fulfilling the analytical and quality assurance/control requirements as outlined in the Plan. Exova Ottawa has significant experience managing the analytical requirements for Northern clients under similar such plans.

Please contact me if further information is required.

Sincerely,

Robert Walker, MCIC, cCT  
General Manager  
Exova – Environmental Ontario
