Re: 1BR-MAC0712 - Defence Construction Canada - Mackar Inlet CAM-5 Project - Amendment - Type "B"

Please be advised that Indian and Northern Affairs Canada (INAC) has completed a review of a type B Water License Amendment Application for Defence Construction Canada's CAM-5 Mackar Inlet Project. The application was submitted to the Nunavut Water Board (NWB) on July 14, 2008 by Ms. Eva Schulz of UMA Engineering Ltd. All associated documents related to this license posted on your ftp site under 1BR-MAC0712 were included in my review.

Project Description:

File #: 1BR-MAC0712
Project: CAM-5 Mackar Inlet Project
Location: Latitude: 68°17'N; Longitude: 85°07'W
Purpose: Change location for water source
Type: "B"

As a result of the review INAC recommends that the Nunavut Water Board impose standard conditions suitable for this size of project and consider the following comments when approving this water license application.

Recommendations:

1 - All sumps, whether for the disposal of grey water or drilling wastes, should be positioned at least 30 m from the high water mark of nearby water bodies. Furthermore, all sumps should be backfilled, mounded to facilitate the shedding of water and contoured to match the surrounding landscape prior to the end of the projects field program.

2 - The Spill Contingency Plan should clarify that all fuel catches will be located above the high mark of any water body. Further, secondary containment, such as a self-supporting berm, is recommended when storing barreled fuel on-site.

3 - The Response Action, of the Spill Contingency Plan should make reference to the Nunavut Spill Report Line and include a copy of the Nunavut Spill Report Form. This form can be obtained from the Nunavut Water Board public registry at <http://www.nunavutwaterboard.org>. Please note that the 24-hour Spill Report Line telephone number is (867) 920-8130 and facsimile number is (867) 873-6924. Furthermore, INAC requests the proponent report all spills to Peter Kusugak, INAC Manager of Filed Operations, phone: 867-975-4295, fax 867-975-6445 as well as the Nunavut Spill Report Line.

Should you have any questions or comments, please do not hesitate to contact me at (867) 975-4738 or by email at Culla@ainc-ianc.gc.ca.

Sincerely,
