Re: Signed Engineered Drawings for Cell Construction.

After months of talking to folks at Dillon Engineering it looks like we might have all our ducks in a row.

I have satisfied all of there company requirements with one exception. I need the signature of release of the person who contracted Dillon in the first place to design and construct containment cells at Nunatta Environmental Services MWN4NUN0511 "B"

Mr. Georges D'Aoust (Jomanic-Can/Northern Futures). Is away in Costa Rica for holidays and we have been unable to reach him. We expect to hear from him soon and when we forward his letter of concent to Dillon Engineering I should receive the file in a couple of weeks.

I am asking you look at everything we have sent in to renew out licience and allow us some time to get this worked out with Dillon.

Thank you

James Wilson
