Dear Mr. Wall:

**RE: NWB Licence No.: NWB5PEL0104 - July Monthly Report**

The following information was compiled by UMA Engineering Ltd., on behalf of Defence Construction Canada and the Department of National Defence, to meet the requirements of the above-noted water use licence for the work at the former CAM-4, Pelly Bay DEW Line site.

The licence requires that quantities of raw water intake from the freshwater supply lake be reported; however, all water and sewer services for the construction camp during the clean up are being provided by the Hamlet of Kugaruuk (formerly Pelly Bay). Correspondence from the Nunavut Water Board (NWB) dated October 1, 2001, stated that if community services are used, these quantities do not need to be monitored. Therefore, no quantities of water and sewer usage are being recorded.

The licence also requires that samples of runoff from the existing landfills and the Tier II Disposal Facility being constructed be collected. There has been no runoff from the existing landfills or the Tier II Disposal Facility during this construction season; therefore, no samples have been collected.

We trust the information provided herein meets the requirements of water use licence NWB5PEL0104. Please contact the undersigned if you have any questions or comments.

Sincerely,

**UMA ENGINEERING LTD.**

Mr. Quinn Taggart  
Hamlet of Kugaaruk  
P.O. Box 205  
Kugaaruk, Nunavut  
X0E 1K0

Dear Mr. Taggart:

Re: Review of 1998-2001 Annual Reports

Please accept this letter as notification that the 1998, 1999, 2000 and 2001 Annual Reports as required under licence NWB3PEL9803 Part B, Item 1 have been reviewed. I apologize for the lateness of this letter, but was pleased to see that you had completed these reports when they were initially received.

The Water Licence requires that tabular summaries of all data generated under the "Surveillance Network Program" be included in the Annual Report. Please note that the samples collected by the Water Resources Officer are not intended to fulfil the license requirements and that the Hamlet should conduct its own sampling program. Also, please ensure that our office is notified of any planned modifications to the water or waste disposal facilities.

Annual reports constitute a critical source of information regarding municipal water use and waste disposal available to the NWB and regulatory agencies, and we appreciate your efforts to comply with this requirement. Please ensure that future reports are submitted prior to March 31 of the year following the calendar year reported. Should you have any questions or comments, please do not hesitate to contact me at (867) 975-4548 or by e-mail at [mcchristie@inac.gc.ca](mailto:mcchristie@inac.gc.ca).

Sincerely,
