Subject: UMA Engineering Ltd. / Defence Construction Canada – New Application Conformity Review- Fox-5 Broughton Island (Qikiqtarjuaq) Dew Line

The Nunavut Water Board received an application for a new licence on April 6, 2001 from UMA Engineering Ltd. on behalf of Defence Construction Canada for water use and waste disposal associated with camp and Dew-Line Clean-Up activities.

In accordance with S.11.5.10 of the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*, this project proposal shall be reviewed by the Nunavut Planning Commission to determine conformity with an approved land use plan, before the application can be processed by the Nunavut Water Board. As we do not have a map showing the exact boundary of the approved land use plan, please let us know as soon as possible, **whether this project falls within the boundary and whether or not it does require conformity review.**

I am faxing some general application documents along with this letter. However, the entire application consists of a 3-inch binder. This binder will be sent by freight to your office later today.

Upon completion of the review, please forward the project proposal with your determination and any recommendations to our office or other appropriate federal or territorial agencies as required. The Nunavut Water Board would appreciate receiving a copy of any correspondence that would indicate the status of the conformity check.

Sincerely,
Original signed by:

Rita Becker
Licensing Administrator
