Subject: Defence Construction Canada/UMA Engineering – Request for Screening – New Application for Fox-5 Broughton Island (Qikiqtarjuaq) Dew-Line

The Nunavut Water Board received an application for a new permit on April 6, 2001 from UMA Engineering Ltd. on behalf of Defence Construction Canada for water use and waste disposal associated with camp and dew-line clean-up activities.

On April 9, 2001, the Nunavut Planning Commission (NPC) confirmed that this application does not fall within the boundary of the North Baffin Regional Land Use Plan, and as such, the project is not subject to conformity review by NPC, prior to being processed by your office.

In accordance with Articles 12 and 13 of the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*, this project shall be screened by the Nunavut Impact Review Board to determine whether it has significant impact potential, and whether it requires review, before the application can be processed by the Nunavut Water Board.

I am sending the specific water licence documents along with this letter. Please note that the entire application consists of a 3-inch binder, but that this binder will not be forwarded to your office, as it appears that most of the information has already been received.

As indicated when I spoke to you on the phone, this application is already been screened by your office; therefore please forward your screening decision to our office upon completion.

Sincerely,
