Subject: Defence Construction Canada/UMA Engineering – Request for Screening – Amendment Application for Fox-5 Broughton Island (Qikiqtarjuaq) Dew-Line

The Nunavut Water Board received an application for an amendment on February 19, 2003 from UMA Engineering Ltd. on behalf of Defence Construction Canada for water use and waste disposal associated with the construction of two landfarms for the treatment and remediation of hydrocarbon contaminated soils and the relocation of a landfill.

In accordance with Articles 12 and 13 of the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*, this project shall be screened by the Nunavut Impact Review Board to determine whether it has significant impact potential, and whether it requires review, before the application can be processed by the Nunavut Water Board.

This application was previously screened by NIRB in 2000 under file number 01DN004. If for any reason, the screening process will be less than 45 days, please let our office know immediately so that we can set our deadline for public concerns accordingly.

Sincerely,

Phyllis Beaulieu
A/Licensing Administrator
