Subject: Re: FOX 5 Water Licence Application

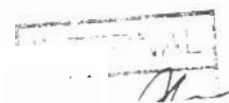

Rita,

If you want this in a letter format please advise and I will re submit. Otherwise, one additional concern that has been raised is:

Two proposed land fill sites are located in a valley area. This valley is the natural drainage path for snow melt which runs into a lake at the bottom. This lake is our secondary water supply. If our reservoir runs empty or is closed for some reason we will go to this lake to obtain our water supply in order to provide a continuous water supply to the community. Our concern is, should one of these land fills develop a leak is their potential for contamination of our secondary or reserve water supply for the community? Can you please submit this concern for evaluation by your board or is it too late?.

thx

dp

A handwritten signature, possibly "M", is written over a rectangular stamp. The stamp contains some illegible text and a date, possibly "MAY 11 2001".
