Subject: Re: 1BR-RES0308 Renewal Application Deficiencies

Good Morning Richard:

I am pleased to provide the following clarification.

1. Greywater and sewage wastes will not be generated during site activities.
2. As stated in the water licence application, 3 L of water will be sampled from each well; not to exceed a total of 25 litres for the entire site. This water is for analytical purposes only.
3. Currently, there have been no changes to the monitoring plan.

Please let me know if you require further information.
Natalie
