Mr. Richard Dwyer  
Licensing Administrator  
Nunavut Water Board  
P.O. Box 119  
Gjoa Haven, NU X0B 1J0

**RE: Water Licence 1BR-RES0916 Amendment Application - Application Deficiencies Response**

Dear Mr. Dwyer:

In response to your request for additional information in advance of circulating the above cited amendment for comments, please find attached the following as Appendices to the initial Application Amendment:

Appendix A) Water Licence 1BR-RES0916 Amendment Request Executive Summary;  
Appendix B) Spill Contingency and Emergency Response Plan;  
Appendix C) GPS Co-ordinates of Monitoring Wells;  
Appendix D) Request for information on monitoring threshold limits, modified Table 1; 2003 Long Term Monitoring Plan; and sampling information pertaining to contact water with Landfarms; responses to concerns raised by Environment Canada;  
Appendix E) Letter from Accredited Laboratory, Quality Assurance/Quality Control Plan  
Appendix F) Executive Summaries in Inuktitut; and,  
Appendix G) Letter from NPC to INAC, December 22, 2008.

Note that in accordance with Section 1.5 of the Resolution Island Monitoring Program (2003), a review of the monitoring requirement for the site will be conducted following the field work scheduled to be undertaken this year.

Nunavut Impact Review Board (NIRB) screening exemption was provided directly from NIRB to the NWB on Friday July 18, 2010. Nunavut Planning Commission (NPC) confirmation that conformity review was not required for an INAC Land Use Permit extension at Resolution Island was obtained on December 22, 2008 (Appendix G). It is our understanding that no change to the status of Resolution Island with respect to territorial land use plans has been made since December 2008. INAC Contaminated Sites has informed NPC that an amendment to the water license at Resolution Island has been submitted.

I trust this will meet NWB requirements for the Amendment Application under review. If you require additional information or clarification please contact Stephen Hooey at (867) 975-4731 or [stephen.hooey@inac.gc.ca](mailto:stephen.hooey@inac.gc.ca) at your convenience.

Best regards,

Natalie Plato, P.Eng.  
Director, Contaminated Sites Program
