Hello Richard,

Per our discussion this afternoon, this is to notify the NWB that the Transport Canada's Resolute Bay Airport Landfill Risk Management and Remediation project will take place as intended over the summer/fall of 2018 and 2019 as previously described and approved (Licence 1BR-RBL1419), with the exception that we will be quarrying aggregate on airport property, rather than obtaining aggregate from the town. The town does not have the capacity to provide the aggregate required.

There will be no increase in water usage or waste output due to this change.

NIRB is in the process of reviewing the comments for approval.

Please contact me if anything further is required.

Thanks,

Holly.
