**Subject: Application for the Renewal of Licence 1BR-RES0308 for the Resolution Island Project**

Dear Mrs. Plato:

The Nunavut Water Board ("NWB") would like to acknowledge receipt on December 1, 2008 of an application for the renewal of water Licence 1BR-RES0308. The application has undergone a preliminary-technical review and a number of issues with the application have been identified that require a response:

1. Clarification is needed on whether greywater and sewage wastes will be generated during site activities and if required, the method of disposal for those wastes;
2. Clarification is needed on the volume of water requested and for what purposes; and
3. The application states that monitoring of the site will be conducted according to the 2003 monitoring plan which was submitted with the renewal. Have there been any changes to the specific monitoring requirements (Table 3), monitoring locations, or proposed monitoring schedule (Table 4) since 2003?

At this time, the NWB is unable to process the application further without the information requested above. Once all the information is provided, the application will be deemed complete and the renewal process can proceed with a thirty (30) day distribution of the application for review and comment by interested persons.

Should you have any questions, please feel free to contact the undersigned at 867-360-6338 or by email: [dbridge@nunavutwaterboard.org](mailto:dbridge@nunavutwaterboard.org).

Yours truly,

Deon Bridge  
Technical Advisor
