### **Recommendations / Comments**

#### **Incineration:**

In accordance with Environment Canada's Technical Guidance document for batch incineration, it is recommended that the proponent employ the use of a dual chamber forced are incinerator with a large secondary chamber, or should circumstances restrict the ability to use such an incinerator, a single chamber incinerator with an afterburner should be used.

Provided consideration is given to the use of an appropriate incinerator, INAC Water Resources Division has no concerns with an amendment to the above noted licence, for the use of a small camp and related water use / waste disposal activities.

Please feel free to contact me at your convenience should you wish to further discuss any part of this submission to the Board. I can be reached at 867-975-4566 or via email, [tanya.trenholm@inac.gc.ca](mailto:tanya.trenholm@inac.gc.ca).
