RE:NWB LICENCE No. 1BR-RES0916

To Whom It May Concern,

Analytical Services Unit (ASU) at Queen's University in Kingston accepts the QA/QC Plan pertaining to the referenced license No. 1BR-RES0916 and will be undertaking the analysis of water, soil and plant samples generated through the Long Term Monitoring Program of Resolution Island overseen by Indian and Northern Affairs Canada (Contaminated Sites Division). The laboratory has been involved with Resolution Island clean up since 1993 and is familiar with all analyses required for this project.

ASU is accredited by the Canadian Association of Laboratory Accreditation (formerly CAEAL) and is a member in good standing. As an accredited laboratory we carry out all analyses in conformance with standards outlined in ISO/IEC 17025. This conformance includes subcontracting criteria and subcontracting may be undertaken as necessary.

Yours truly,

Allison Rutter
Director,
Analytical Service Unit
School of Environmental Studies
Queen's University
Kingston ON Canada
