Subject: Spill Contingency Plan –Sarcpa Lake Project

Dear Mr. Martin:

Please be advised that the Nunavut Water Board (NWB) has reviewed the revised “Spill and General Contingency Plan” (dated August 24, 2004) which was submitted to the Board in accordance with Part F, Item 2 of water license NWB5SAR0406. Following an internal and public review of the document, several concerns were raised by Environment Canada regarding the submitted Plan. Accordingly, the Board has approved the submitted Plan (**Motion # 2004:39**), with the requirement that the following information be submitted as an Addendum to the approved Plan within sixty (60) days:

1. A site map which clearly indicates the location of the PCB and hydrocarbon storage areas and all spill control equipment on the site;
2. The contact information for the Site Supervisor and other applicable spill response personnel;
3. The minimum standards for training for on-site personnel, including contractor and sub-contractor personnel; and
4. The response pathway for hydrocarbon spills on land and water.

Please feel free to contact me at your convenience if you have questions.

Sincerely,

Original Signed By:

Philippe di Pizzo
Executive Director
