Subject: Spill Contingency Plan- Sarcpa Lake Project

Dear Mr. Di Pizzo:

In response to your letter of October 6, 2004 attached please find an updated spill response plan which includes:

1. A site map which clearly indicates the location of the PCB (PCB storage/ Warehouse Site) and hydrocarbon storage area.

Please note that, as per the project work plan, all barreled PCB contaminated soils have now been removed from the site to a licenced disposal facility in Quebec where they will be destroyed.

2. The contact information for the Site Supervisor and other applicable spill response personnel in SECTION 5 and in TABLE 1: Contact List.
3. The minimum standards for training for on-site personnel, including contractor and sub-contractor personnel in SECTION 2.5 1. (a)
4. The response pathway for hydrocarbon spills on land and water in SECTION 2.5 and 2.5.1.

Please do not hesitate to call me if you have any questions or comments.

Your truly,

Robert Martin
Contaminated Sites Project Officer
Contaminated Sites Program
