Subject: RE: Council Meeting

Hi Gary Strong

I believe, we've not received any copy of submitted permit applications. Please send copies for PW&S record. Please send a copy of minutes of meeting for held tele-conferencing. In re of tomorrow's site trip, we'll proceed as per schedule and will make changes as required.

Subject: RE: Council Meeting

The client meeting occurred via tele-conference when you were on vacation. The fees related to this meeting have been expended.

We have included the reduction in airfares and disbursements based on the required flight to Cambridge Bay. It is more expensive to fly to Taloyoak.

Permit applications have been submitted to the required boards and agencies. Numerous discussions with these agencies have occurred over the period of the design. This includes NIRB, DIAND, DFO, EC, NWMB, and NWB. As such, the budget for this work is nearly expended. Additional time is also anticipated for the completion of these permits.

In summary, the budgets set out for the original scope of work have been expended on the work described in the scope of work. The council meeting is clearly a scope change, as is the change in the proposed site. There was no requirement for the council meeting in the original request for services. Per your latest e-mail, we will proceed with a council meeting on a time and disbursement basis, as an extra to our contract.

If this is not satisfactory to your department, please contact us immediately.

Regards

Gary Strong

Attention: Robert Eno

Landfarm Construction
Taloyoak, Nunavut

Dear Mr. Eno:

Attached is the project description for the above undertaking. We have completed this project description in the format outlined in the *Environmental Information Guide for Industrial Projects on Commissioner's Lands*. Also attached is the project construction drawings and the site location drawing. There has been a change of site to meet the community's requirements.

The Government of Nunavut is undertaking the project on commissioner's lands. The project is within municipal boundaries, and we understand that this means that NIRB does not review the project.

We further understand that this project does not require permits from any agency. We request that your department provide us with confirmation of that the project proposed meets the requirements of DSD.

Thank you for your consideration in this matter.

Yours sincerely,

Dillon Consulting Limited
